

Long Division - 02

Name: _____

1. Use long division then Solve x.

$$x^3 - 3x^2 + 5x - 3 \div (x - 1)$$

3. Use long division then Solve x.

$$x^3 - 3x^2 - 2x + 6 \div (x - 3)$$

2. Find the remainder. $x^4 + 4 \div (x^2 - 5)$

4. Find the remainder. $x^3 - 4 \div (2x + 5)$
